

## You can help spread the word!

We thank you for being our patient and hope that the service that we are providing to you is second to none. There are many who are looking for the right answer in dental and periodontal care. Where do they search? The Internet.

Prospective patients look at reviews on the Internet as for guidance in choosing the correct dentist. Your review would go a long way toward helping those prospective patients choose the right dentist. As most people use Google as their internet search engine, a Google review is more likely to be viewed. But if there is another review site that you prefer, please share your review in that way.

Here's how to do a Google review: (Note: You must have a gmail account to make a Google review. To do that, first go to [www.gmail.com](http://www.gmail.com) and follow the instructions. A gmail account is free, and you do not have to use it in place of your regular email address. Then you will be able proceed.)

1. Open Google Maps and make sure you are signed in.
2. Search for your doctor.
3. When the name appears, click on the line that says, "Write a review." A box will open for you to write the review.
4. Please be careful in choosing the number of stars in the review. A five star review is the best review.
5. If you have any problems, please call our office.

There is no obligation to do a Google review. This is entirely voluntary and is certainly appreciated.

I look forward to seeing you again. If you have any questions or problems that you'd like to discuss with me or with my staff, please don't hesitate to call us.

Sincerely yours,
